*Defenders*  
OF THE GUT

## FARROWING PIGLETS

Start feeding piglets MSP[RS] Resistant Starch at birth to ensure a calm, steady environment within the digestive tract and set the stage for good gut health in the farrowing crate.

MSP[RS] feeds the friendly bacteria in the gut microbiome, and establishes a large community of these defenders of the gut. They help to protect and defend the intestinal environment from most enteric challenges to keep piglets healthier.
